CLIC Innovation: a powerhouse for green system transition

endurance
green accelerator for EU clusters

CONTEXT AND OBJECTIVES

CLIC Innovation is a powerhouse for green system transition. Its mission is to build and manage open innovation collaboration between companies, academia and other relevant stakeholder groups in bioeconomy, energy and circular economy themes.

The organisation focuses on systemic challenges, that arise from the scarcity of natural resources and drive green system transition.

IMPACT

- 6 ongoing ecosystems managed by Clic.
- 45 Projects initiated from the ecosystems.
- 92% success rate for Finnish Business Finland funding applications.

DESCRIPTION OF BEST PRACTICE

Clic aim is to create additional value to its partners by building, coordinating, and managing R&D&I projects to construct systemic solutions, which are beyond the resources of individual operators.

As part of their value proposition, Clic Innovation has developed a set of ecosystem facilitator tools and training services which are designed to help and guide emerging and existing ecosystems and their facilitators to manage their own ecosystem operations successfully and efficiently.

Playbook tools and training services are a part of CLIC Innovation's service offering and include both free and premium content and services under CCY licences.

REPLICABILITY POTENTIAL

Taking an open innovation facilitation approach can boost communication, dissemination, exploitation and impact for RDI activities. Clic drives the transition with its open innovation ecosystems and projects with quadruple helix approach. Such approach can be applied to different sectors and clusters have a clear orchestration role in bringing together a wide range of complementary stakeholders.
